

## Person of Peace - insights

### Why work through PoP?

- They can access social networks which are closed to outsiders.
- They can gather people more than an outsider can.
- They can be used by God to gather people and win people, who can eventually become simple fellowships and movements of new believers.

### They use existing social glue

- They can focus on existing social groups coming to Christ.

It is easier this way, than winning individuals who are not already connected, and then trying to get them to trust each other and be friends.

- Keep your Person of Peace at the centre of a social group and not yourself.

### How do you know if you have a PoP?

- A PoP is not just a friendly person, they are more than this.
- You don't really know who is a PoP until you look back at what they have done.
- Finding a PoP is the hard work of a movement – there are disappointments.
- PoP is someone who responds to your mentoring and training.
- They may never come to Christ, but usually do.
- They could be an existing follower of Christ.

### Do not financially support a PoP.

- Let them use their own resources! Why?
